## Company's history

I.T.I. s.r.l. was founded in the 1981 from the experience gained by the founding quotaholders in the field of the electrical and instrumental engineering especially oriented in power, refineries and petrochemicals plants.

The main purpose was to create a structure capable of providing qualified services of electrical and instrumental engineering, through the exploitation of the characteristic combination of high technical skills, competitiveness in the reference market and flexibility in the company organization.

Over the years the business strategy leads I.T.I. s.r.l. to make strong relations with the major companies, both national and international, becoming one of the landmarks of this field of activity.

In 2009, in order to take care, more effectively, of the European market, I.T.I. s.r.l. sets up a branch in Bratislava (Slovakia).

## Activities

I.T.I. s.r.l. is specialized in the design of electrical and instrumental engineering related to industrial plants and important infrastructures.

### Power Plants

- nuclear power plants
- combined cycle power plants
- thermal power plants
- hydroelectric power plants

### Energy transmission

- high voltage substations GIS & AIS
- high voltage overhead lines

### Renewable sources

- pv plants
- wind power plants

### Oil&gas

- refineries
- petrochemical
- LNG plants
- pumping station

### Infrastructures

- hospitals
- tunnels
- railway routes
